

Equity Market Sustains Loss Till Day Two

The equity market closed the day's trading session in the negative territory as the NSE All Share Index and Market Capitalization declined by 0.17% to close at 26,540.87 points and ₦9.13 trillion respectively. The Year-to-Date (YtD) and the Quarter-to-Date (QtD) returns stand at -7.34% and -6.33%, while the Month-to-Date (MtD) and the Week-to-Date returns stand at +5.15% and -0.62% respectively.

NSE Sector Indices: Only one of the major NSE Indices (within our coverage) advanced in points while the five major NSE indices declined in point. The only NSE index advancer for the day is the NSE Insurance (+0.44%) while the NSE Index decliners for the day are the NSE Oil & Gas (-1.85%), the NSE Banking (-0.37%), the NSE 30 (-0.19%), the NSE Consumer Goods (-0.08%) and the NSE Premium (-0.05%).

The market breadth (gainers/losers) of 1.05x for the day indicates that the number of buyers outpaced the number of sellers in the market today. At the end of the day's trading, 21 stocks advanced as 20 stocks declined; NASCON (+5.26%), NEM (+5.00%) and JBERGER (+4.98%) led the gainers chart while FO (-9.74%), INTERLINK (-5.00%) and VITAFOAM (-4.94%) led the losers chart for the day.

The day's trading activities by volume was led by UBA (75.535 million), FBNH (29.127 million) and ZENITHBANK (25.629 Million) while the activity by value was led by NB (₦0.885 billion), GUARANTY (₦0.437 billion) and ZENITHBANK (₦0.370 billion).

Outlook: Equity market sustains loss till the second day of the week's trading session as most of the sectoral indices within our coverage decline in points. We attribute the southward movement of the market to selling pressure on some blue-chip stocks which persisted from the last day's trading session. That said, we think the index could stage a modest recovery in the coming session even as market breadth turned positive.

I BALANCED FUND

Investment takes different forms. In investing you need to consider a few basic things;

- a) What opportunities exist in the market
- b) How much capital to commit into investment.
- c) Transaction cost
- d) Skill and time to monitor the investment
- e) How to exit the investment

Many people often ask the question why a particular stock made more than 390% last year, and think 'if I had put my money in there my investment would have quadrupled'. While that is true, have you considered investing in some stock that delivers a negative return of about 65%? - That could be catastrophic. You wouldn't know on face value what stock would likely do well at the end of the day. This is why diversification is essential, so that as your portfolio risk is spread out.

It does not require a huge amount to build a well-diversified portfolio. One can benefit from portfolio diversification, professional management, competitive returns and broad investment opportunities simply by investing in a vehicle such as a Mutual Fund. Buying into a fund provides great benefit to investors with limited knowledge, time or money, while expanding the opportunities available to the investor.

A Balanced Fund is a type of collective investment scheme that invests in multiple asset classes giving you an opportunity to benefit from a broader range of investment securities. Let me introduce PACAM Balanced Fund sponsored by the PAC Asset Management LTD.

The PACAM Fund is an Open-ended Balanced Fund that will be invested in a mix of instruments across four asset classes and target locations are as follow ; Equity (up to 40%), Bonds (up to 15%), Money Market (up to 15%) and Real Estate (up to 30%.) The Fund seeks to achieve an efficient balance between capital appreciation and income for investors with modest risk appetite.

Unit Of Sale: Minimum of 50,000 units and multiples of 10,000 units thereafter.

Offer Price: N1:00 per unit
