

Equity Market Stays in the Green Zone as Market Capitalization Gains N22.5 Billion in the Day

The equity market closed the day's trading session in the positive territory as the NSE All Share Index and Market Capitalization advanced by 0.25% to close at 25,739.18 points and ₦8.86 trillion respectively. The Year-to-Date (YtD) and the Quarter-to-Date (QtD) returns stand at -10.14% and -9.16%, while the Month-to-Date (MtD) and the Week-to-Date returns stand at +1.97% and -0.01% respectively.

NSE Sector Indices: Four out of the major NSE Indices (within our coverage) advanced in points while two major NSE index declined in points. The NSE index advancers for the day are the NSE Premium (+1.32%), the NSE Banking (+0.36%), the NSE Insurance (+0.26%) and the NSE 30 (+0.06%), and while the only NSE Index decliner for the day is the NSE Oil & Gas (-0.62%) and the NSE Consumer Goods (-0.51%).

The market breadth (gainers/losers) of 0.95x for the day indicates that the number of sellers outpaced the number of buyers in the market today. At the end of the day's trading, 19 stocks advanced as 20 stocks declined; FO (+10.24%), HONYFLOUR (+9.28%) and PORTPAINT (+4.59%) led the gainers chart while TOTAL (-9.08%), INTBREW (-5.00%) and MOBIL (-5.00%) led the losers chart for the day.

The day's trading activities by volume was led by DIAMONDBNK (80.272million), INTBREW (16.465 million) and TRANSCORP (11.406 Million) while the activity by value was led by MOBIL (₦0.395 billion), INTBREW (₦0.297 billion) and NB (₦0.066 billion).

Outlook: The equity market sustains rally on the back of further bargain hunting activities, given the relatively low pricing of some fundamentally justified stocks The market would have however closed negative (-0.35%) ex-DANGCEM (1.16% gain) which was the major driver of the market in the day. We expect the market to close with a marginal gain Week-to-Date, given the significant loss recorded on the second trading day of this week.

I BALANCED FUND

Investment takes different forms. In investing you need to consider a few basic things;

- a) What opportunities exist in the market
- b) How much capital to commit into investment.
- c) Transaction cost
- d) Skill and time to monitor the investment
- e) How to exit the investment

Many people often ask the question why a particular stock made more than 390% last year, and think 'if I had put my money in there my investment would have quadrupled'. While that is true, have you considered investing in some stock that delivers a negative return of about 65%? - That could be catastrophic. You wouldn't know on face value what stock would likely do well at the end of the day. This is why diversification is essential, so that as your portfolio risk is spread out.

It does not require a huge amount to build a well-diversified portfolio. One can benefit from portfolio diversification, professional management, competitive returns and broad investment opportunities simply by investing in a vehicle such as a Mutual Fund. Buying into a fund provides great benefit to investors with limited knowledge, time or money, while expanding the opportunities available to the investor.

A Balanced Fund is a type of collective investment scheme that invests in multiple asset classes giving you an opportunity to benefit from a broader range of investment securities. Let me introduce PACAM Balanced Fund sponsored by the PAC Asset Management LTD.

The PACAM Fund is an Open-ended Balanced Fund that will be invested in a mix of instruments across four asset classes and target locations are as follow ; Equity (up to 40%), Bonds (up to 15%), Money Market (up to 15%) and Real Estate (up to 30%.) The Fund seeks to achieve an efficient balance between capital appreciation and income for investors with modest risk appetite.

Unit Of Sale: Minimum of 50,000 units and multiples of 10,000 units thereafter.

Offer Price: N1:00 per unit
