

NSEASI Declines by 0.54%

The equity market closed the day's trading session in the negative territory as the NSE All Share Index and Market Capitalization declined by 0.54% to close at 25,322.30 points and ₦8.76 trillion respectively. The Year-to-Date (YtD) and the Quarter-to-Date (QtD) returns stand at -5.78% and -5.78%, while the Month-to-Date (MtD) and the Week-to-Date returns stand at -2.74% and -1.86% respectively.

NSE Sector Indices: Only one of the major NSE indices (within our coverage) advanced in points while the remaining five major NSE Index declined in point. The only NSE index advancer is the NSE Insurance (+0.67%) while the NSE index decliners are the NSE Consumer Goods (-1.62%), the NSE 30 (-0.62%), the NSE Oil & Gas (-0.44%), the NSE Banking (-0.43%) and the NSE Premium (-0.10%).

The market breadth (gainers/losers) of 0.33x for the day indicates that the number of sellers outpaced the number of buyers in the market today. At the end of the day's trading, 9 stocks advanced as 27 stocks declined; MANSARD (+4.61%), UACN (+4.14%) and CAVERTON (+3.45%) led the gainers chart while PZ (-9.73%), 7UP (-5.00%) and FO (-4.99%) led the losers chart for the day.

The day's trading activities by volume was led by FIDELITYBK (24.436 million), DIAMONDBNK (20.295 million) and ZENITHBANK (12.502 Million) while the activity by value was led by NB (₦0.461 billion), NESTLE (₦0.386 billion) and ZENITHBANK (₦0.188 billion).

Outlook: The gains recorded in the previous trading proved a dead cat bounce as the market returns in the southward direction. The negative return in the day's trading session can be attributed to pressured sell-offs on blue-chip stocks especially in the Consumer goods sector. Also, given the overall downtrend in the market as investors await more earnings scorecards, market performance remains dictated by investor's reactions to earlier releases as well as short term momentum trading. Nonetheless, we expect the index to close the week negative.

I BALANCED FUND

Investment takes different forms. In investing you need to consider a few basic things;

- a) What opportunities exist in the market
- b) How much capital to commit into investment.
- c) Transaction cost
- d) Skill and time to monitor the investment
- e) How to exit the investment

Many people often ask the question why a particular stock made more than 390% last year, and think 'if I had put my money in there my investment would have quadrupled'. While that is true, have you considered investing in some stock that delivers a negative return of about 65%? - That could be catastrophic. You wouldn't know on face value what stock would likely do well at the end of the day. This is why diversification is essential, so that as your portfolio risk is spread out.

It does not require a huge amount to build a well-diversified portfolio. One can benefit from portfolio diversification, professional management, competitive returns and broad investment opportunities simply by investing in a vehicle such as a Mutual Fund. Buying into a fund provides great benefit to investors with limited knowledge, time or money, while expanding the opportunities available to the investor.

A Balanced Fund is a type of collective investment scheme that invests in multiple asset classes giving you an opportunity to benefit from a broader range of investment securities. Let me introduce PACAM Balanced Fund sponsored by the PAC Asset Management LTD.

The PACAM Fund is an Open-ended Balanced Fund that will be invested in a mix of instruments across four asset classes and target locations are as follow ; Equity (up to 40%), Bonds (up to 15%), Money Market (up to 15%) and Real Estate (up to 30%.) The Fund seeks to achieve an efficient balance between capital appreciation and income for investors with modest risk appetite.

Unit Of Sale: Minimum of 50,000 units and multiples of 10,000 units thereafter.

Offer Price: N1:00 per unit
