The Year-to-Date (YtD) and the Quarter-to-Date (QtD) returns stand at -2.78% and -2.78%, while the Month-to-Date (MtD) and Week-to-Date returns stand at -2.78% and -2.77% respectively

The market breadth (gainers/losers) of 0.31x for the day indicates that the number of sellers outpaced the number of buyers in the market today. At the end of the day's trading, 7 stocks advanced as 27 stocks declined; MCNICHOLS (+10.00%), SUNUASSUR (+10.00%) and LEARNAFRCA (+8.73%) led the gainers chart while REDSTAREX (-9.09%), FIRSTALUM (-8.57%) and NIGERINS (-8.33%) led the losers chart for the day

Outlook: Bearish run continued as NSE ASI declined by 1.89%. The dominance of sellers in the market reflected on the market breadth of today's activity as it is at 0.31x (vs 1.21x in last trading day).

Going forward, we do not expect the bearish run to dominate the year 2019 as we expect the uncertainty surrounding the Nigerian equity market to end after the general elections. As a result, we advise our clients to start taking position in the companies that have good dividend payment history

BALANCED FUND

Investment takes different forms. In investing you need to consider a few basic things;

- a) What opportunities exist in the market
- b) How much capital to commit into investment.
- c) Transaction cost
- d) Skill and time to monitor the investment
- e) How to exit the investment

Many people often ask the question why a particular stock made more than 390% last year, and think 'if I had put my money in there my investment would have quadrupled'. While that is true, have you considered investing in some stock that delivers a negative return of about 65%? - That could be catastrophic. You wouldn't know on face value what stock would likely do well at the end of the day. This is why diversification is essential, so that as your portfolio risk is spread out.

It does not require a huge amount to build a well-diversified portfolio. One can benefit from portfolio diversification, professional management, competitive returns and broad investment opportunities simply by investing in a vehicle such as a Mutual Fund. Buying into a fund provides great benefit to investors with limited knowledge, time or money, while expanding the opportunities available to the investor.

A Balanced Fund is a type of collective investment scheme that invests in multiple asset classes giving you an opportunity to benefit from a broader range of investment securities. Let me introduce PACAM Balanced Fund sponsored by the PAC Asset Management LTD.

The PACAM Fund is an Open-ended Balanced Fund that will be invested in a mix of instruments across four asset classes and target locations are as follow ; Equity (up to 40%), Bonds (up to 15%), Money Market (up to 15%) and Real Estate (up to 30%.) The Fund seeks to achieve an efficient balance between capital appreciation and income for investors with modest risk appetite.
